Subject: Yucca Mountain - Please think of our children

LSN: Relevant - Not Privileged
User Filed as: Excl/AdminMgmt-14-4/QA:N/A

Dear Folks,

1 [Regarding the proposed plans for Yucca Mountain - Please consider what kind of world we are leaving to our children. Please, carefully examine the possible disasters created by storing such a huge amount of toxic material in a seismically insecure location. We are facing a future of certain weather destabilization. Known Environmental factors have not been adequately considered, let alone unknown ones. Please do not rush forward with a harmful plan. It is time for us to stop and think deeply, to search for new alternatives that were not available in the past. It is time to establish a new way of life on Earth and to abandon old ways that have proven destructive. Don't try and ride into the New Age on a dead horse.] Wake up! Find the new ways. They are there!

Peace

Carol Francia
