I [I have been informed on your plan to dump nuclear waste on Yucca Mountain. Is nothing sacred to the government?!

If a Church was bombarded with garbage and spray paint would that be alright with you, would it not matter, because either way the garbage had to go somewhere right?

I don't think so. Yet this mountain, sacred to the Shoshone nation, because of it's bountiful herbs and mythical inspiration is going to be destroyed after thousands of years. And what for? To bring more dangerous pollution into America wilderness, as if we didn't have enough. This is disgraceful, statues of apostles and saints aren't destroyed to make room for corporations greed. This is not about religion, it's about respect.]
