Dear Department of Energy,

I am writing to protest the use of Yucca Mountain as a nuclear waste disposal site. I am aware that the Shosone people view Yucca Mountain as a sacred site for many reasons and that to use it for nuclear waste disposal would desecrate it forever.

I also object because of the many geological faultlines which run through Yucca Mountain thus making it a very unstable site for storage of highly toxic and radioactive waste. This waste must be safely stored for thousands of years with zero contact with the world outside the storage containers.

My final concern is that to centrally store most of the nation's nuclear toxic waste in a single high profile repository is not secure enough from terrorism since trains and trucks bringing waste would be easy to attack.]

For all these reasons, I implore you to consider Yucca Mountain to be the wrong solution to our nation's nuclear waste storage problems.

Sincerely,
Janet L. Beazlie
