Subject: Depositing Radioactive Waste in Yucca Mountain

LSN: Relevant - Not Privileged
User Filed as: Excl/AdminMgmt-14-4/QA:N/A

I [I urge you to abandon plans to deposit radioactive waste in Yucca Mountain. It is a geologically unstable place, making these plans very dangerous. I also think it is dangerous to transport such waste across America. There are too many opportunities for accidents in such trips., and they leave us much more vulnerable to terrorist attack. Some other solution must be found that does not involve transporting nuclear materials long distances and into an area that does not want it in the first place.]

Thank you for your consideration.

Sincerely,

Anne C. Askren 156 Wakefield Drive, Athens, GA 30605

Start the year off right. Easy ways to stay in shape.
