I [To you, it is an arid, sparsely populated area of Nevada. To us, it is Holy Ground.
Putting nuclear waste here is not a good idea. People still come here to gather herbs and medicines.
According to the stories of our elders, although no seismic activity has been detected, the snake will
"turn" again.
I hope you are not foolish enough to disregard stories of the elders. Their accuracy has been pretty
good so far.
If there is even the remote chance that this area is unstable, the waste cannot be put here. Activity of
any sort will bring consequences that I don't want to see, and I'm sure none of you do either.
I hope you give this careful consideration before making any decision.]

...Tonight's the night the world begins again...
