12 --> I protest any attempt to establish Yucca Mountain as a repository for nuclear waste. Please discontinue this deplorable initiative.

Our current nuclear waste must remain at the sites making the waste. No new nuclear plants can be built until the nuclear waste problem is solved, and there is no evidence to date that it can be solved. Therefore, there should not be any new nuclear plants planned for or built.

I am a true NIMBY when it comes to waste. I do not want any nuclear waste products passing by my community by rail (and we are a huge rail corridor) ever! Does anyone else? There was a horrendous derailment this fall in Ohio, and it took days to put the fire out. Noone can promise this will not happen, and noone knows what would happen if a storage container of nuclear waste was damaged or destroyed.

This is not a viable option, and all plans for the Yucca mountain repository must stop now.]
