Comment Text :

--> Dear YMP folks -

1 [I'm writing to express my continued opposition to the proposed high-level nuclear waste storage facility at Yucca Mountain. The supplemental materials filed in October 2007 as part of the environmental review are not persuasive and do not alleviate my concerns.

The geology of the site is unsuitable for this project, the transportation of waste from reactors across the country is dangerous and poses many security issues that have been dismissed in these supplements. The TAD containers appear to be incompatible or fairly complicated to mesh with many dry cask storage systems at ISFSIs in other parts of the country. The social justice issues with respect to the concerns of the people of the Western Shoshone nation have also been ignored.

I'm not from Nevada and I live in a state where we generate nuclear waste. I believe that we here in Wisconsin should be responsible for taking care of the nuclear waste that we've created and not dump this problem on the citizens of Nevada and those citizens living in the path of the proposed rail and truck shipments. I completely respect the repeated statements and legal attempts by the State of Nevada to not become host to the nation's nuclear waste.]

Thank you for your time and allowing the public to comment on this proposal.
