Comment Text :

1 { --> The location of the High Level Nuclear Waste Repository at Yucca Mountain, Nevada, is illegal. It is also an environmental and terrorist disaster waiting to happen. The DOE cannot guarantee that the nuclear waste placed under the mountain, which is sacred to the Western Shoshone nation, will be safely contained for the required one million years. The Department of Energy should back off of its arbitrary cutoff date of July 30, 2008, and take public comments and its own research into consideration. Do not make Yucca Mountain a nuclear waste dump.
