Greetings,

I [I've been a resident of Connecticut for 27 years. I'm very concerned about national security issues as they relate to catastrophes of nuclear plant/reactor facilities. I'm equally concerned about future risks regarding the transportation and storage of nuclear waste. In particular I'm opposed to the proposal for storing nuclear waste a Yucca Mountain. Please consider all the validated problems that would result from such a facility located at Yucca Mountain.]

Thank you.
