Comment Text :
--> Re: Comments on draft Repository Supplemental Environmental Impact
Statement and
draft Nevada Rail Corridor/Alignment Environmental Impact Statement

I have just been reading information about this on your web site and on this
site: <http://www.h-o-m-e.org/Yucca/index.htm>
There are so many points of contention that an independent body, as suggested
on the Yucca pages, must be set up without delay.

It is regrettable, to say the least, that so many nuclear explosions have
already taken place on the Nevada Nuclear Test Site. It is difficult to ignore
the fact that almost every Native American Nation is fighting some
multinational company or other over the use of what's left of their land and
more often than not, there are issues around careless waste disposal and
poisons left behind. The corporate PR has always been very different to the
reality on the ground.

I urge you to make a proper assessment of ALL aspects of this proposal,
disclosing all relevant information and using correct figures for
calculations.

Yours sincerely,
Sanda Kolar
