IR ---> I have lived here for a little over 5 years and see absolutly no valid reason as to why Yucca Mountain cant be a Waste center. Where are we suppose to put it? In the ocean, near a major city? in the antartica? Come on, people need to stop complaining about it and look at it from a realistic stand point. Nevada is an ideal spot to put it. Its in the middle of the desert where the climate is harsh and the possibility of people building near it are almost nill. If there is a leak (which I beleive all possible scenarios have been tested) its not that close to a major city. I think when the words Nuclear and Waste are in the same sentence people automatically assume that its a bad thing. Well I for one dont have an issue with it and think that we should us Yucca Mountain as a Nuclear/Hazard waste center. ]
