To Whom It May Concern:

I [ I am stunned that Yucca Mountain is still being considered as a repository for high-level radioactive waste. The site has been proven to be leaky and geologically unstable. With 33 geologic faults in an area also classified as a Class 4 earthquake zone, any reasonable conclusion would of the facts would take Yucca off the table. It is also completely opposed by both the Western Shoshone Nation and the State of Nevada.

Please stop wasting our tax money on an idea that belongs in the trashcan. ]

Sincerely,

Kathleen Boutis
