Subject: I oppose nuclear waste dumping at Yucca Mtn. in Nevada!

LSN: Relevant - Not Privileged
User Filed as: Excl/AdminMgmt-14-4/QA:N/A

Department of Energy:

To Whom It May Concern:

I [I am very concerned about proposed dumping of nuclear waste in the unstable region of Yucca Mountain in Nevada. I have several problems with the whole situation!

Nuclear energy is dangerous and produces waste that is toxic and unstable and hangs around forever.

The waste is hard to store and often is dumped in places precious to those who aren't considered very important—like the Native Americans of the Shoshone tribe.

In this case, the Yucca Mtn. region is unstable, with fault lines and potential volcanic activity beneath the area! How much sense does that make? Why store problematic waste in a problematic area?

Please reconsider the proposed storage of radioactive material at Yucca Mtn.]

Respectfully,

Stephanie M. Fairchild
