Dear Responsible Agents

1 [ I was very dismayed when I heard that plans are going forward to use Yucca Mountain as a disposal site for nuclear waste. Everyone is aware of the dangers of such waste to the environment and, therefore, those who create the waste work to have it removed from their area. We will never have a viable nuclear policy until those who create the waste have to deal with it afterwards.

Scientists have spoken of the danger of earthquake in the area, and the danger of water and air contamination inherent in the process of storage and transportation of such waste. ]

2 [ The American Indians have (once again) been denied the rights they have under treaty for this is their land and their sacred space. ]

I urge you to do all you can to stop nuclear waste from being transported across American roads and stored anywhere except the place where it is first used.

Sincerely

*Delores Kincaide*

*Marion Palma  
(same address  
as above)*
