Comment Text :

[-> I do not see any reason NOT to store the radioactive material Yucca Mtn. After all the ground there is useless anyway as the plutonium has a half life of 250,000 years. That land is virtually useless for anyone to live on, as it is now. And to get it there, a track for trains, could be routed around the Vegas area, through areas that have no persons living on it and not through the city or cities in the areas around Las Vegas. There is a lot of open land in which that could be achieved. Where else does Hillary Clinton and Harry Reed propose to store this waste if not in Yucca Mtn. where it is contaminated already? My dad worked there at the Testsite in the 50's and 60's and said it would never be worth anything anyway and is not going to contaminated the ground water for Las Vegas. It is absurd to have spent all that money and man power to get where they are on building it just to stop now and have cost the citizens so much money. What a waste of tax payers money. ]
