Comment Text :

1 [---> I knew a technical writer that had to support one of the Yucca Mountain contractors, and she frequently had to "massage" or "put a spin" on the technical reports in order to be approved by the DOE. I am adamantly opposed to this hideous, corrupt project that is:

>NOT based upon sound science. Some of the real physicists were asked to leave the company because they questioned motives

>NOT in the better interests of the residence of Nevada and even the Western region of the United States

If nuclear waste is "safe" then why don't they store it near the sites where it is generated??

Enough is enough!! DOE is so "out there" that they don't get it. Workers, scientists and physicists live here and have families. Does the upper management actually think that these employees who know the truth want to subject their families and future generations of family members to this nonsense??]

I think not!!!
