Comment Text :

1 [--> To reduce dependence on oil and other sources of carbon based fuels, we need to safely develop Nuclear Energy. To do this we need to have a plan for the safe storage of spent nuclear fuels. The Yucca Mountain Repository is such a place. We need to develop the Yucca Mountain Repository as well as other safe storage locations in the future.

The opponents of the Yucca Mountain Repository seem to base there reasoning on a "not is my back yard" attitude or a total rejection of any peaceful usage of Nuclear Power. This attitude is not in the best long-term interest of the United States and the world.]
