

* My dear fellow energy minded earthlings,
I [We need to store this waste somewhere and just like the gold mine tailings are valuable now to "re-mine", we Americans will come up with a use for the spent fuel. Nevada should have ALL the future rights and profits to it as well. We used to blow up nukes in the desert and watch them for fun.....what is more efficient than a nuclear power source? Let our fellow Americans store the waste here and charge them up the kazoo!]
