

Notes: p. 24776 Federal Register/Vol. 61, No. 96 / <sup>3rd column</sup> Comments on Hospitals

Although Joint Commission requires training for decontamination of HAC MAT, it is still important that hospitals, especially along corridors, ~~are~~ be aware of "elements" being shipped, risks <sup>and</sup> treatments necessary, and what training is available for their use in <sup>meeting</sup> their Joint Commission requirements. Hospitals should have SAME access to education & training that everyone else has (EM). They may not require the funding proposed for the States/Tribes use.
