 5
 6 Comments by the Nuclear Waste Citizens Coalition on Proposed Section 180 (c), revised
 7
 8
 9 We appreciate the DOE's efforts to take into account comments submitted by several
 10 commenters. In several areas DOE's revised proposal has moved in the directions commenters,
 11 including the Coalition, have suggested. In some other areas, we have apparently agreed to
 12 disagree. We wish here merely to reiterate the comments we made earlier that DOE did not
 13 choose to accommodate, including, for example:
 14
 15 1. Taking seriously an update of NUREG CR-2225.
 16 2. Setting a federal floor of adequacy in emergency response capabilities.
 17 3. Early identification of modes and routes.
 18 4. Codifying 180 (c) policy into regulation.
 19
 20 We look forward to working with DOE and other stakeholders in the fleshing out of this policy.
