SUPPLEMENTAL YUCCA MOUNTAIN RAIL CORRIDOR AND RAIL ALIGNMENT ENVIRONMENTAL IMPACT STATEMENT (DOE/EIS-0250F-S2 and DOE/EIS-0369)

Interested Public:

The U.S. Department of Energy (DOE or the Department) is announcing its intent to expand the scope of the ongoing Environmental Impact Statement for the Alignment, Construction, and Operation of a Rail Line to a Geologic Repository at Yucca Mountain, Nye County, Nevada. The expanded scope will supplement the rail corridor analyses of the Yucca Mountain Final EIS (DOE/EIS-0250F), and analyze the Mina corridor. This Supplemental Yucca Mountain Rail Corridor and Rail Alignment EIS also will consider, in detail, alignments for the construction and operation of a rail line within the Caliente and Mina rail corridors.

The Department invites comments on the scope of the Supplemental Yucca Mountain Rail Corridor and Rail Alignment EIS to ensure that all relevant environmental issues are addressed. DOE will consider all comments received during the 45-day public scoping period, which ends November 27, 2006. Comments received after this date will be considered to the extent practicable.
