JACK WISCOMBE: Jack Wiscombe,

1 W-I-S-C-O-M-B-E, Goldfield.  
2 I want to see this used for something  
3 other than just hazardous waste. You know, I'm  
4 retired from Ground Mountain Gold, and mining  
5 is -- you know, we've got it here. It's -- it's a  
6 good future for Nevada. And mining could use the  
7 railroad, plus a lot of other people, not just  
8 mining, but -- so I would like to see it.  
9 I mean, even passenger cars, people can  
10 travel on it. It's going to be -- we know it's going  
11 to be safe, and so it would be safe for the  
12 passengers to ride it, too. Plus anything else,  
13 anybody else that wants to use it.  
14 I guess that's about my main concern.
