RECEIVED DOCUMENTS
MAY 9 1997
SECRETARY

Gentlemen,

Haven't we had enough?

How much more must the American people put up with, from the American government's approval of flooding imports from slave labor, communist countries such as China, Mexico etc. before we learn our lesson. Are they our friends? No! It's pretty plain to most Americans -- why can't the Washington politicians understand? Has corruption in our government gone this far.

We have always held high regard for the integrity of our government; however, it seems politicians are politicians as long as money is the object. Must the U.S. become a third world country too. The NAFTA and GATT treaties, plus uncontrolled numbers of immigrants, without

skills or knowledge of our language, pouring into the U.S. has only one purpose or end. To lower wages and the standard of living of the majority of Americans.

Backtiring up labels by claiming a product is made in the U.S.A. with 25% import material doesn't satisfy here and isn't feeling honest Americans.

While I am retired, I have sympathy for the still working American and his future. It is becoming bleaker with every move Washington's policy makers make.

Let's get back on track and make some decisions that are constructive and will help the American people regain some hope and dignity.

Thanks
Herald Adams
