

Made In the USA Policy Comment,
To whom it may concern:

I strongly disagree with the changes proposed for the meaning of the "made in the USA" label. We need to keep the current standard! Consumers will be the losers if this changes! Big companies such as New Balance and Hyde Athletics will be the winners. I always thought that the role of the Federal Trade Commission was to protect the consumer and not to cater to the wants of big business. If the FTC starts catering to big business by changing the "Made In the USA" meanings consumers will have no choice or knowledge about a products' ^{IE} USA made content. PLEASE don't change the current meanings!! As a consumer I think we deserve an FTC that looks out for us! Stop catering to big business & do your job! over →
