Washington, D.C. 20580

FCR: made in U.S.A. Labels

The made in the U.S.A. Label should stay  
98% made in the U.S.A. NOT 75%, 50% or any other  
percentage.

IF you are going to use percentages than state  
what ~~percentage is made~~ percentage or what  
exact materials are made in the U.S.A. IF it  
assembled in the U.S.A. than state it is  
NOT manufactured by assembled in U.S.A.

The Truth in Labeling Laws require in food  
what percentage is fat, etc. on clothing it  
states ~~what~~ how much is cotton, etc.

MAKE the made in the U.S.A. more informative,  
NOT less informative. The consumer will make the choice
