Dear Sir.

I'm a patriot and I love this country
being that I spent 4 years in the Marine Corps.

What I don't understand is how many companies
are here in the U.S.A. and almost everything you
want to buy reads "Made in China and overseas." It's
a shame that these same companies here in U.S.A.
are heading out overseas where they employ cheap labor
to make profits and you stand for that. Give our
people here in the good U.S.A. jobs so they can earn
money to go on with their lives. It should be on all
labels made in U.S.A. - just sew soles and say
it's made in U.S.A. I read about Stanley Tools
where they complain they can't make a profit buying
raw materials here but want to buy it overseas. If they
don't like tell them to get out of here and let
some mfg employ people here. In all I for one
wants to keep that slogan "Made in U.S.A." as it
is and don't want to change it. When I'm shopping
I always look at the label and if doesn't say "Made in
U.S.A." I don't buy. What I can't understand is
why do you listen to these big wheels who want
everything their way. Listen to the people the buyers
who want to keep that up "Made in U.S.A."

These big companies move overseas and to Mexico
leaving people here without jobs and then there they
make a big profit and send the products here for us
to buy. Let them stop buy from us the people of
U S A who make the products here.

This letter isn't going to change your mind
because us smalls guys don't stand a chance

All in all I for one hopes that you don't change
Made in U S A to help those big companies

Thank you

Sincerely Yours
August Lee

P.S

Let us Americans know how we rate of this
issue " Made in U. S.A.
