

Dear Sir -

After reading news Brief in regard to mixed products, I object to the FTC Commission industry label shoes made in foreign parts.

Shoes manufactured in U.S.A including all parts are sized better, have a better last and form to the foot better.

Relaying labor is cheap in foreign countries, exporting and importing is expensive.

It's about time shoe manufacture open factories in in the U.S.A.

Sincerely

Mrs L Gordon

P.S. - The public should be able to walk into a store and find pigs in narrow widths also. - Not put their foot into a #1 - B when a AAA is needed.
