

June 17th 1997

Hello,

I have a concern that you let products that say "Made in the USA" be not 100% Made in the USA. I like to buy things that say "Made in the USA" because I feel better about supporting my country than another.

My question is - do products which say "Made in the USA" get fully made here or just put together here? Do different rules go with different products?

Thank you for your time.
