To whom it may concern,

I read with interest an article about "Made in the USA".

I am so sick of trying to buy anything & everything that is solely made in America. It is impossible to find the smallest gadget to the most expensive piece of clothing.

Labels are from countries I never heard of and some I cannot pronounce.

Makeup, underwear, accessories, hand bag, bed sheets, etc, etc, etc.

Regardless of price I try only to buy Made in America but then I find out some part is from some-

where else.

Do not say "Made in U. S. A." if  
the entire product is not. At least  
tell us what is from another country.

I still will not buy anything  
that reads "China".

Because of the loss of American  
Goods, I do very little shopping  
anymore, only what is necessary.

For what this is worth, these  
are my comments.

Sincerely

Mrs. H. E. Rager
