Dear FTC,

I cannot put into words the disgust and dismay I feel when I hear the federal government wants to relax the "all or virtually all" of a product label Made - in - the - USA. The people in the U.S. have a right to know of the products made in the USA. What's more, the FTC should be doing every thing in its power to promote items Made - In - The - USA. Please consider my families wishes when making changes.
