Washington D.C.

Mr. D. Clark, I am shocked to think large companies feel the need to trick the good people of this broad nation by putting a label saying Made in U.S.A. when it; the product was made elsewhere maybe assembled in the U.S.A is used now. Changing the meaning of label made in. (-S[A. to anything other than it says exactly what it means is outrageous.

It is time our government stopped selling the citizens that pay and pay for a dishonest dealings because some fat cat wants more. I ask you to only be honest and remember if you cheat the average citizen now sooner or later it will come back to you and your children.

Thank you  
Daniel Seymour
