Regarding changing the rule about
Made in The USA products:

"Made in The USA" means exactly what
it says. Made in the U.S.A! Not 75% made
in the USA.

This is merely a deceptive practice by
manufacturers to keep the American public
in the dark about the origin of merchandise.

In today's global market, no country
should be ashamed or afraid to tell
people where products are made.

Unless, of course, they are ashamed because
of low quality, or poor working conditions.
