Dear Mr. Clark,

It is my understanding that the F.T.C. is about to change the requirements needed to put a Made In U.S.A. label on items sold in the United States of America.

How can that be?

Using the term "substantially made in U.S.A." STINKS!

The product should show to be made with products by American workers and assembled in American plants! I know this is not being done because your F.T.C. made many concessions to big business and the product now only need to be assembled in this country with some American made materials.

"Substantially" made in U.S.A. to business means using unskilled, underpaid workers and inferior cheap materials, produced overseas, shipped to this country, packaged and sold to Americans as "made in U.S.A."!

It's a deception!!

As the United States of America's Federal Trade Commission you are responsible to the American consumers. Don't lie, if the American companies want to abandon the work force of this country to produce cheap imitations and inferior products. Let them, that is the American way!

But don't allow them to use in U.S.A. labels if it isn't true. Why do they want to lie and cheat? They know that the American workers produce some of the highest quality work in the world. Bar none! Don't degrade the American worker by a blowing

July 16, 1997

a label to be put on a garbage product produced somewhere else but using "Made in U.S.A." !!

Please keep the integrity of your F.T.C. office by keeping the Made in America label for those products made and produced in the true United States of America -- the greatest country in the world!

Mr. Joseph Bean
