Dear Mr. Clark,

What is the trade commission trying to do about the made in the USA? I'm proud to read or and buy made in the USA. I do think that anything that has other countries parts or has been put together in another country is not made in the USA. This sounds like a Communistic approach to undermining the good old USA.

Please make sure that this doesn't happen to our Country. Speak up and take a stand. This isn't right and you know it. Be proud of America. God has blessed us you know. Pray about this.

Feel free to write or call if you need my help.
