

With SNORENZ, Snorers can reduce snoring noise & end sleepless nights now!!!

Snoring related disruptive-sleeping steals sleep from 90 million victims every night. It can lead to stress, anxiety, exhaustion and hostility. Snoring exacerbates risks associated with high blood pressure, obesity and even lowered resistance to infection. It can trigger breathlessness during sleep. It is destructive to personal relationships, memory and career success.

We have good news for snorers and people who have to listen to them. SNORENZ® helps reduce snoring noise - simply, naturally and effectively.

[Company Overview](#)

Med Gen manufactures, markets and licenses healthcare products, specifically to the market for alternative health self-care. One out of two households practice some form of alternative self-care. Industry observers estimate this market's size at \$27 billion a year, a level of consumer expenditure double the level of 1990. The two most prominent factors contributing to this growth are (i) increasing levels of education among consumers; and (ii) changing patterns of primary care (both in cost and in delivery).

The Company's flagship product has been **SNOREnz**, a throat spray which reduces or eliminates the sounds ordinarily associated with snoring. **SNOREnz** is free of artificial colors, flavors or preservatives. Its patented liposome technology delivers droplet spray misis directly to the back of the throat, lubricating the uvula and soft palate that vibrate with each breath. Each application lasts about eight hours. Moreover, the all-natural peppermint taste further provides the satisfaction of waking up without a morning breath.

SNOREnz is currently sold through a number of Fortune 100 retailers representing a marketing network in excess of 25,000 stores nationwide. With sales of **SNOREnz** now consistently more than \$500,000 per month, the Company has accelerated its timetable to introduce three additional products that either deploy its proprietary technology or otherwise address the \$27 billion alternative self-care market: (i) **4-in-1**, a topical analgesic for joint and muscle aches; (ii) **Snore Quell** GlucoFree snoring relief for people with Type-2 diabetes; and (iii) **ComfortCare**, a line of pain relief products that are topically-applied magnetic compression wraps.

"Hey friend!
Snorenz saved my
marriage"

As Televised on
CNN

"Before I found SNORENZ®, I tried everything... tapes, tablets, nose spray."

"Nothing worked like SNORENZ® works."

- Albany, New York

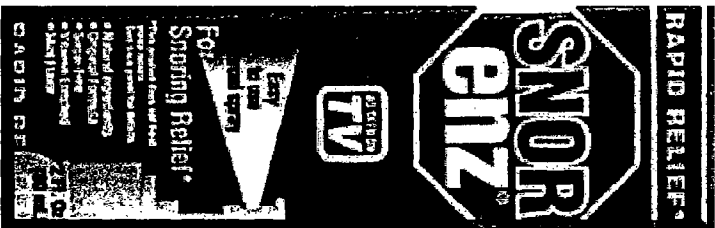

Dear Med Gen:

My husband has had the good fortune to make his snoring cease. He had apnea and has snored heavily for years. We noticed little or no improvement in his snoring even after the operation. I ordered SNORENZ® from a TV advertisement. He tried it and snores lightly - no rattling the house, and he dreams now which is an indication of REM sleep. I suppose he feels rested - and we feel rested too. After 44 years of heavy snoring, it is a real pleasure to find a product that works. An additional fortune is that it is natural. Ahhh... Thanks SNORENZ®!

A Ladder of Relief Options

Not Every Body Responds The Same Way

While the pharmaceutical market doubled to \$145 billion between 1996 and 2000, pain-killers tripled to \$1.8 billion over the same period. But not everyone responds the same way. For many, they are a blessing. For others, a nightmare in potential risks of over-use, side-effects, abuse and spiraling costs. Different people respond differently to the same drug, not to mention the placebo effect which may be operative in up to 35% of cases. *WSJ 4/11/01*

Healthcare providers have traditionally treated pain in a step-wise fashion progressively increasing prescription-strength analgesics. Stepping up the ladder of pain-relief options is so individual, some professionals now consider non-drug therapies as intermediate steps to avoid the risks of adverse effects of increasing drug potency. ComfortCare Compression Supports with Magnets are one such alternative.

Keep Your Options Open

Advice is recommended from your local health professional when needed. Drugs may also be an option, even as adverse drug-related risks grow. Yet, there are non-invasive options. ComfortCare is one such an alternative offering.

Comfort Care

ComfortCare Magnets are developed by using a magnetization pattern that results in positive and negative polarities on opposing sides of its device. Opposing polarities meet over a large distance on opposite sides of our magnets, creating a deep magnetic field trajectory. This helps to relieve minor discomfort by increasing blood flow to an affected area.

Gentlemen:

I would like to inform you that I have used your **SNORENZ®** product and found it to be the only product I have ever tried that has had any effect on my snoring. My girlfriend particularly wants to thank you for coming up with great solutions to this problem. She looks forward to enjoying many nights of good sleep thanks to **SNORENZ®**.

Roy Saffin
Boca Raton, Florida

Dear Sir:

Thanks for my sample of **SNORENZ®**. My wife has been complaining about my snoring for years and she's had me try everything under the sun. **SNORENZ®** is the first thing that has actually worked. When I first tried **SNORENZ®**, I was skeptical, but my wife says that she can finally sleep through the night. She says that my snore was equivalent to a Harley Davidson at full throttle. When I first tried **SNORENZ®**, she told me that the sound was reduced to the light hum of a moped and now she can't hear much of anything. I guess she should be writing this letter. Thanks **SNORENZ®**.
