

NETL Applications: September 2008

Application Name	Application Acronym	Application Description
Assessment Information Input System	AIIS	Tracks findings and corrective actions of routine safety walkthroughs, SARS, and other ES&H evaluations
Automated Time Attendance and Production System	ATAAPS	New time and attendance program for all Federal employees
Award Closeout	AWARD CLOSEOUT	Control Closeout System - Used by Acquisition and Assistance Division to report on contract closeouts.
Blackberry Enterprise Server	BES	System is used to integrate Groupwise with Blackberry mobile devices.
Condition Assessment Information System	CAIS	Survey of site condition assessments that feeds to DOE-HQ. Costs utilized in CAIS have been developed by the RS Means Company through average nationally available cost data for the construction of facilities. Oracle client is required.
Computer Based Training	CBT	Provides computer-based courses as required, based on job description. Tracks individual employee's completion of courses and their scores.
Computerized Maintenance and Property Management System (162)	CHAMPS	Work order tracking and maintenance numbers for cost
Corporate Human Resource Information System	CHRIS (PeopleSoft)	(used by HR personnel). Contains personnel information. System of Record for Human Resources as well as training/benefits. NETL customized version of PeopleSoft software.
Personnel Management System	CORE	Personnel Locator System- Tracks detail info for all employees, ie site, building, rm, etc. Eliminates rekeying of data in other apps. Creates internal phonebook and provides accountability listings.
Cumulus	Cumulus	a digital asset management software, helping to organize, find, share and track the ever-increasing numbers of photos, illustrations, presentations, video, audio, layouts and more.
I-Manage Data Warehouse	DOE IDW	I-Manage Data Warehouse contains STARS, STRIPES, PADS and DOE Payroll data.
DOE Information	DOEINFO	DOE Query and Reporting Tool- Queries DOEInfo for financial information.
Director's Office Tracking System	DOTS	Distributes action items to various office managers.
Drawing Retrieval System	DRS	Database for all CAD drawings.
Filenet/EDMS	EDMS	Tracks action items and correspondance received and distributed by the Director's office. Consists of third party software, Java 2 Runtime and Panagon Viewer.
Facilities Information Management System (Web-based)	FIMS	HQ system for reporting site facilities information.
FireProof	FireProof	Tracks fire equipment including extinguishers and sprinklers.
Federal Information Tracking System	FITS	Tracks deliverables required and received per contract award. FITS interfaces with PADS info.
Federal Procurement Data System	FPDS-NG	Maintains aquisition award info.
Goldmine	GOLDMINE	Event Management Software- Tracks event information for events off DOE website.
Gov-Trip	Gov-Trip	Replacement for Travel Manager, system for processing travel requests/payments
GRB Assist	GRB Assist	Federal Retirement Calculator; A network based installation to workstation.

GroupWise (Novell)	GROUPWISE	GroupWise is a secure, dynamic collaboration solution that offers your traditional and deskless users support for any communication over intranets, extranets and the Internet. GroupWise allows corporate users to manage documents, share calendars and control project workflow across network operating systems.
Heat	Heat	Help Desk trouble ticket and knowledge base information system.
iHeat	iHeat	Web client for Heat.
Infrastructure Security and Energy Restoration Division	ISER	DOE owned web site working in conjunction with Homeland Security to ensure a robust, secure, and reliable energy infrastructure.
Jmat Pro	Jmat Pro	Used in conjunction with Thermo-Calc
Northwest Analytical Laboratory Information System	LIMS (Albany)	Two modules: 1) Database and reporting of analytical results from chemistry & physics labs. 2) Submitting and tracking work requests for the shop services.
NETL Business Intelligence (Cognos)	NETL BI	Contains Business Intelligence "portals" supporting multiple NETL business units.
NETL Data Warehouse	NETLDW	Pulls together informaton in STARS, STRIPES, DOEInfo, FITS, PADSinfo, PMRS and ProMIS from ODS info to the data warehouse. The data warehouse is built in an Oracle 10g data warehouse environment and uses IBM/Cognos Business Intelligence for graphical presentation of information to the user.
Occupation Health Maintenance	OHM	Used to maintain occupation health information on site employees. Interfaces with multiple OHU devices.
PADS Info	PADS	FPDS-NG and PADS feed data into PADS Info. PADS Info feeds data into DOE IDW.
Procurement and Assistance Data System	PADS DOE	Houses all awards information (acquisition and financial assistance).
Property Administration and Management System	PAMS	Used to house and control all assignment property for NETL and association branches. Have ties with other system like SPS and CORE. Utilizes Oracle FORMS and REPORTS technology.Requires Oracle 6i client on desktop to run.Supports barcode scannings.
Property Administration and Management System- for windows	PAMS_CE	Inventory Barcode Reader Porgrm. This program runs on a Windows CE PDT8100 device allowing to login, set location and scan inventory. It utilizes ActiveSync software to download the created file processing in PAMS
People Search	PEOPLE SEARCH	Web-based search tool for providing employee contact information
Peopleware	PEOPLEWARE	Conference Services- Allows for set up and management of conferences and attendees mailings and to generate mailing lists and produces name badges. Pulls information from Goldmine.
Peopleware- Internet Registration Module	Peopleware_in	Conference Services- Allows Communication between the Peolpeware database and the on line registration service that NETL purchases on a yearly basis.
Key Personnel Calendar	PERSONNEL CALENDAR	Weekly calendar of key personnel absences and acting designees. Publishes to Intranet
Project Issue Tracking System	PITS	Tracks items, such as issues, risks, help desk tickets, anything that requires a workflow. Workflow can be customized as well as permissions at the field level and on transisions.
Planning Management Reporting System	PMRS	NETL custom web based application. Displays STARS/IDW inforamtion. Used to complete budget planning for NETL organizations.
Procurement Request Action Tracking System	PRATS	Electronically routes procurement requests through automated workflow. Submits to PATS. (HQ app, but NETL pulls data from it)

Project Management Information System	ProMIS	Tool for project managers to administer their projects.
Personnel Tracking System	PTS	The Personnel Tracking System (PTS) will function as an automated solution which will support in-processing, out-processing and onsite movement of all badged personnel, DOE and non-DOE, for the NETL sites. PTS streamlines the workflow processes reducing paperwork, simplifying process steps and reducing manual effort and costs.
Quantum Facts / WebRTK	QUANTUM FACTS	Quantum Chemical Database-Chemical inventory and MSDS repository. Utilizes Web RTK Module
Records Management System	RMS	Records retention database
Shuttle/Vehicles	Shuttle/Vehic	Reservation system for NETL Shuttle and Government vehicles
Sigma Plot	Sigma Plot	Technical graphing software
STARS or STRIPES	SOS	Helper application for use with DOE-wide STARS or STRIPES systems.
Small Purchasing System	SPS	Small Purchasing system. Handles any purchases on credit cards or small contracts.
Site Support Task Management (SSTM) V2	SSTM	Replaces the current SSTM application and provide more flexible workflow. Tracks all tasks under ITES, SAS, SOS, RDS, TAMS support contracts
Starlims	Starlims	StarLims- Laboratory information management system for sample analysis.
Standard Accounting and Reporting System	STARS	Headquarter's accounting and reporting system. Used to record and make payments on DOE invoices.
Skandata	Storeroom In	COTS product used by Warehouse personnell for inventory purposes
Thermo-Calc	Thermo-Calc	Includes DICTRA23, TCCQ, TCW3. Thermodynamics software.
TrackWise	TrackWise	Used to support submitting and tracking of ES&H issues.
Web Admin	WebAdmin	Primary functions control common login controls for new applications and logging features. Also common controls for role-based security for new applications. Compliant with latest security requirements.
Windows Systems Approach to Grants Administration	WinSAGA	Provides data collection and submission from EE grants to STARS.
