

THE WHITE HOUSE
WASHINGTON

February 16, 2006

Dear Mr. Speaker:

Today, I am submitting a request for Fiscal Year 2006 supplemental appropriations of \$72.4 billion for ongoing military and intelligence operations in support of Operation Iraqi Freedom, Operation Enduring Freedom, and selected other international activities. These funds support U.S. Armed Forces and Coalition partners as we advance democracy, fight the terrorists and insurgents, and train and equip Iraqi security forces so that they can defend their sovereignty and freedom. Already more than 35 Iraqi battalions have assumed control of their own areas of responsibility. This request provides the resources necessary to continue that effort so the Coalition can continue to hand over control of more territory to Iraqi forces.

In Afghanistan, our Armed Forces continue to track down terrorists, help the Afghan people rebuild their country, and train and equip Afghan security forces so that Afghanistan may continue to take control of its democratic future. Our coalition has trained many thousands of Afghan soldiers and police. These forces are risking their lives to fight our common enemy. This request provides the resources necessary to continue the train and equip effort so Afghan forces can eventually provide for the security of their own citizens.

The request includes funds to confront the threat from Improvised Explosive Devices and to improve the protection of our forces. In addition, the request addresses the need for substantial investment to repair or replace equipment worn out or lost in military operations. It also provides additional funding to cover the costs of restructuring the Army and Marine Corps into more agile, self-sustaining units that provide increased combat effectiveness critical to winning the Global War on Terror.

The request includes bonuses and incentive pay to properly compensate American troops for the sacrifices they make in defense of freedom. It also includes funds to cover enhanced benefits for survivors of all military members and provides for newly-authorized benefits for those injured in combat.

The request also provides funds for the extraordinary security and operating costs associated with supporting U.S. diplomatic activity in Iraq and Afghanistan.

The request includes funds to help create political and economic stability in post-conflict areas, help Iraqis protect and sustain their infrastructure, and build Iraqi capacity at the national and provincial levels for better, more responsive and transparent governance. The request also supports the successful Commander's Emergency Response Program that enables military commanders to respond to urgent, small-scale, humanitarian relief and reconstruction needs in their area of responsibility. These counter-insurgency and stabilization activities help build civilian capabilities to ensure the transition to greater Iraqi self-reliance. Coupling increased civilian capacity with increased military capacity is essential to sustained progress in all realms -- security, political, and economic -- and is essential to neutralizing the insurgents and defeating the terrorists.

Finally, the supplemental requests funds for urgent, unanticipated needs to help relieve human suffering associated with a number of humanitarian crises, including Sudan and other parts of Africa, assistance for refugees, and the costs of humanitarian relief and reconstruction efforts in response to the devastating earthquake in Pakistan. The request also includes funding to address urgent democracy-promotion activities in Iran.

I hereby designate the specific proposals in the amounts requested herein as emergency requirements. This request reflects urgent and essential requirements. I ask the Congress to appropriate the funds as requested and promptly send the bill to me for signature. The details of the request are set forth in the enclosed letter from the Director of the Office of Management and Budget.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Dennis Hastert". The signature is stylized and cursive, with a large, sweeping flourish at the bottom.

THE DIRECTOR

EXECUTIVE OFFICE OF THE PRESIDENT
OFFICE OF MANAGEMENT AND BUDGET
WASHINGTON, D.C. 20503

February 16, 2006

The President
The White House

Submitted for your consideration is a request for FY 2006 supplemental appropriations totaling \$72.4 billion to fund ongoing military, diplomatic, and intelligence operations in the Global War on Terror; stabilization and counter-insurgency activities in Iraq and Afghanistan; and other humanitarian assistance. This request supports our Strategy for Victory in Iraq and efforts to support democracy in Afghanistan. This request is in addition to the \$50 billion already appropriated for FY 2006 Global War on Terror costs.

A total of \$65.3 billion of the new supplemental request is for the Department of Defense (DOD); \$2.9 billion is for Intelligence Community management and classified programs in support of the Global War on Terror; \$4.2 billion is for international functions, including the Department of State; and \$16 million is for other agencies, including the Departments of Justice and the Treasury for counter-terrorism efforts and assistance to the new Iraqi government. The major categories of funding are highlighted below.

Military and Intelligence Operations

- This request includes over \$38 billion to fund combat operations in support of Operation Iraqi Freedom and Operation Enduring Freedom during FY 2006. The two key elements in this category are pay and operational costs -- such as food, water, spare parts, transportation, and logistics support.
- Funding is also requested for a range of other items including: medical benefits and welfare/morale programs for the military; higher fuel costs; new military construction in theater; and intelligence activities supporting the Global War on Terror.
- The request includes \$2.9 billion for a wide range of classified activities in support of the Global War on Terror. These activities include support to military operations, intelligence collection and analysis, and overseas law enforcement efforts. Also included are funds to enhance the capabilities of the Office of the Director of National Intelligence and to sustain National Counterterrorism Center operations.

Equipment and Force Structure Changes

- The request includes \$8.3 billion to refurbish or replace equipment that is worn out or damaged from operating in harsh conditions in Iraq and Afghanistan, \$2.0 billion to confront the evolving threat from Improvised Explosive Devices, and \$2.6 billion to improve the protection of our forces by adding armor to all convoy trucks, and buying armored security vehicles, night vision equipment, and helicopter survivability systems.
- The request also seeks \$3.4 billion to continue investment in Army Modularity, a multi-year plan to restructure the Army's forces by creating new, more flexible and self-sufficient brigade-sized units. This marks the last year supplemental funds will be requested for this plan. Funds are requested as part of the base budget in FY 2007 and beyond. Supplemental funds are necessary now to support the accelerated creation of new modular combat brigades, which will reduce deployment frequency and stress on soldiers and their families. When completed, Modularity will also increase the number of active Army combat brigades by 30 percent and reorganize the remainder of active, guard, and reserve combat and support forces. An additional \$0.2 billion is requested for the Marine Corps and other services to continue implementing organizational changes that increase combat effectiveness and reduce the frequency of deployments for specialized units.

Iraq and Afghanistan Security Forces and Coalition Partners Support

- The request continues support for a robust effort to build Iraqi and Afghan security forces through the Iraq Security Forces Fund (\$3.7 billion) and the Afghan Security Forces Fund (\$2.2 billion). This funding is key to our Strategy for Victory in Iraq, turning over control of more territory to Iraqi forces, and ensuring democracy in Afghanistan.
- The proposal also includes \$2.0 billion for our Coalition partners' activities in direct support of our military operations, including Pakistan's counter-terrorist operations along its border with Afghanistan and the Polish forces' efforts in Iraq.
- The request includes \$423 million in additional funds to continue the Commander's Emergency Response Program, the successful program that enables U.S. military commanders to respond to urgent, small-scale humanitarian relief and reconstruction needs in their area of responsibility. This program is important to the success of the counter-insurgency effort in both Iraq and Afghanistan.

International Affairs and Stabilization Activities

- The request seeks \$4.2 billion for international affairs programs as follows.
 - \$1.7 billion for extraordinary wartime costs for the State Department embassy and the United States Agency for International Development operations and their security in Iraq and Afghanistan;

- \$1.6 billion to help create political and economic stability in post-conflict areas, help Iraqis protect and sustain their infrastructure, and build Iraqi capacity at the national and provincial levels for better, more responsive and transparent governance. Coupling increased civilian capacity with increased military capacity is essential to sustained progress in all realms – security, political, and economic – and is essential to neutralizing the insurgents and defeating the insurgents.
- \$514 million for urgent humanitarian relief and peacekeeping funding for Darfur and Southern Sudan, including funding for the African Union mission in Darfur.
- \$149 million for refugees and emergency food aid to respond to crises, primarily in Africa.
- \$126 million for the U.S. response to the devastating earthquake in Pakistan.
- \$46 million for a limited number of unanticipated costs to support our reconstruction commitment to Afghanistan, including debt forgiveness and emergency electric power needs.
- \$75 million for democracy promotion activities for Iran.

Recommendation

This request fulfills known and urgent requirements that cannot reasonably be met through the use of existing agency funds. I recommend that you designate the specific proposals contained in this transmittal as emergency requirements.

I have carefully reviewed these proposals and am satisfied that they are necessary at this time. Therefore, I join the heads of the affected Departments and agencies in recommending you transmit the proposals to the Congress.

Legislative Branch

This request also contains \$41.2 million in emergency supplemental requirements for the U.S. House of Representatives and the Architect of the Capitol for security purposes. As a matter of comity, appropriations requests of the Legislative Branch are commonly transmitted without change.

Sincerely,

Joshua B. Bolten

Peacekeeping Operations

For an additional amount for "Peacekeeping Operations," \$123,000,000, to remain available until September 30, 2007: Provided, That such sums as may be necessary may be transferred to and merged with "Contributions for International Peacekeeping Activities," for peacekeeping operations in Sudan.

The request fully supports the African Union's (AU) work in Darfur, Sudan. It will help to ensure that the AU has the resources necessary to provide for continued humanitarian access, as well as to protect civilians. In the period prior to enactment of this supplemental request, the Administration will continue to support the AMIS mission by deferring some activities in other peacekeeping operations programs including the Global Peacekeeping Operations Initiative, which is the Administration's effort to strengthen worldwide peacekeeping capacity. Once supplemental resources are provided, funding will be restored to this complementary, high priority program.

The request also fully supports the U.S. initiative to transition from the AMIS force to a United Nations effort by enabling a funding transfer to the CIPA account. On January 12, 2006, the AU Peace and Security Council agreed in principle to seek a transition from the AMIS force to a UN operation within the framework of partnership between the AU, the UN, and their respective members. The United Nations Security Council has begun to consider transitioning from the AU force in Darfur to a UN force. Funding within the Peacekeeping Operations account with potential transfer to the CIPA account to fund subsequent UN assessments would preserve flexibility, given the range of options and scenarios that will be addressed by the Security Council. The Administration anticipates a robust Chapter 7 mandate for a UN mission in Darfur that would charge the UN mission with monitoring ceasefire agreements, protecting civilians, protecting the humanitarian response, and monitoring compliance with previous Security Council resolutions.

This proposal would provide the necessary appropriation for the current balance of the account, \$5.8 million, to be spent in support of the Global War on Terrorism.

United States Contribution to NATO Common-Funded Budgets in FY 2006

Sec. . Section 1005(c)(2) of the National Defense Authorization Act, FY 2006 (P.L. 109-163) is amended by striking "\$289,447,000" and inserting "\$345,547,000".

The FY 2006 National Defense Authorization Act (NDAA) authorized the Department of Defense to make a contribution of \$289.4 million to the NATO Military Budget in 2006. On February 7, 2006, the 26 NATO members agreed on cost figures to cover the full expansion of the International Security Assistance Force (ISAF), a United Nations-mandated mission in Afghanistan that exists to create a stable and secure environment in Kabul and its vicinity. The Military Budget costs for the expanded ISAF mission are estimated at an annual cost of 205 million Euros, of which the United States cost share of 22.5428 percent is 47 million Euros, or \$56.1 million (at \$1 = €0.8378). In order to meet these revised cost obligations, the current authorization cap as specified in the NDAA must be raised.

The expansion of ISAF will enable NATO to take on additional responsibilities in Afghanistan, including taking over operations in southern Afghanistan from the U.S.-led coalition. The expansion will also allow the United States to re-deploy approximately 3,000 soldiers currently stationed in Afghanistan. The increase in the NATO Military Budget will cover costs associated with management of the port of debarkation, support to medical facilities (role 2 and 3), support to communication systems, support to headquarters activities, fuel storage, travel, transportation, and supplies.

Drug Interdiction and Counter-Drug Activities, Defense

Sec. . (a) Authority To Provide Support. -- Of the amount appropriated by this Act under the heading, "Drug Interdiction and Counter-Drug Activities, Defense", not to exceed \$40,000,000 may be made available for support for counter-drug activities of the Governments of Afghanistan, Pakistan, Tajikistan, Turkmenistan, and Uzbekistan: Provided, That such support shall be in addition to support provided for the counter-drug activities of such Governments under any other provision of the law.

(b) Types of Support. -- (1) Except as specified in subsections (b)(2) and (b)(3) of this section, the support that may be provided under the authority in this section shall be limited to the types of support specified in section 1033(c)(1) of the National Defense Authorization Act for Fiscal Year 1998 (P.L. 105-85, as amended by P.L. 106-398 and P.L. 108-136), and conditions on the provision of support as contained in section 1033 shall apply for fiscal year 2006.

(2) The Secretary of Defense may transfer vehicles, aircraft, and detection, interception, monitoring and testing equipment to said Governments for counter-drug activities.

(3) For the Government of Afghanistan, the Secretary of Defense may also provide individual and crew-served weapons, and ammunition for counter-drug security forces.

This section would enable the DOD to increase its assistance to the counter-narcotics forces of the governments of Afghanistan and neighboring friendly countries. Improving their counter-drug capabilities will allow the U.S. and its regional partners to more effectively stem the tide of drug trafficking in the region. Curtailing the drug trade will help to dry up one source of funding for terrorist elements in the region.

Emergency and Extraordinary Expenses (EEE) Authority

Sec. . Under the heading, "Operation and Maintenance, Defense-Wide," in title II of the Department of Defense Appropriations Act, 2006 (Public Law 109-148), strike "\$36,000,000" and insert "\$56,000,000".

This section would provide the Secretary of Defense with additional authority for extraordinary and emergency expenses, which cannot be anticipated, in order to support emergent requirements associated with Iraq and the War on Terror.

Increase in Advance Billing Limitation

Sec. . Notwithstanding 10 U.S.C. 2208(1), the total amount of advance billings rendered or imposed for all working capital funds of the Department of Defense in fiscal year 2006 shall not exceed \$2,000,000,000.

This provision would increase the limitation on advance billing of working capital fund customers from \$1 billion to \$2 billion in FY 2006. Advance billing is a temporary management action to avoid insolvency in the working capital funds. The limitation was imposed in FY 1999 and the business base of the funds has changed significantly since then. To avoid Anti-Deficiency Act violations, agencies may be forced to delay reordering sufficient supplies to maintain inventory levels needed for the war effort. To prevent that, an increase in the advance billing limitation to \$2 billion is requested.

Working Capital Funds are designed to be flexible and responsive to customer demands within a business-like structure. The Funds have surged in response to the Global War on Terror and, in total, are operating at levels 27 percent greater than their peacetime business base. In dollar terms, the Defense Working Capital Funds are operating \$24 billion above their \$89 billion peacetime base. For certain of the funds, business has grown 70 to 90 percent above the peacetime level. These funds have been priced for their expected wartime workload for the last three budgets and no longer accumulate cash based on the difference between peacetime and wartime workload. Current and projected cash balances are below Department minimum targeted levels because of rate reductions, cash transfers, and congressional reductions. These low balances increase the risk of fund insolvency. The requirement to provide logistics support during war and the financial volatility involved in a large and uncertain growth in business dictate a larger advance billing limitation for financial flexibility in managing these funds.

Commander's Emergency Response Program

Sec. . In addition to amounts authorized in section 1202(a) of Public Law 109-163, from funds made available in this Act to the Department of Defense, not to exceed \$423,000,000 may be used to fund the Commander's Emergency Response Program and for a similar program to assist the people of Afghanistan, to remain available until December 31, 2007.

Commander's Emergency Response Program (CERP) enhances the capability of the military commanders to combat terrorism and to support U.S. military operations in Iraq and

Afghanistan. The program provides results that people can see. Examples of projects include water and sanitation, electricity, and health care.

The CERP was first provided appropriated funds and included Afghanistan under section 1110 of P.L. 108-106.

The CERP has proven to be a high-impact program indispensable to security and stabilization efforts in Iraq and Afghanistan. Providing a source of cash, it enables military commanders -- who are often the only U.S. government officials in daily contact with communities about local needs -- to respond immediately to small-scale but urgent humanitarian relief and reconstruction requirements. The program builds trust and support at the grassroots level.

Authority to Continue Charging Supervision and Administrative Costs to the Iraq Security Forces Fund and Afghan Security Forces Fund

Sec. . Supervision and administration costs associated with a construction project funded with Afghan Security Forces Fund or Iraq Security Forces Fund appropriations may be obligated at the time a construction contract is awarded: Provided, That for the purpose of this section, supervision and administration costs include all in-house Government costs.

This provision would allow DoD to use Afghan Security Forces Funds (ASFF) and Iraq Security Forces Funds (ISFF) for supervision and administration costs of construction projects which will be completed after FY 2006. To complete ASFF and ISFF projects in an efficient and effective manner, the continued oversight of the Project Contracting Office is required to close-out ASFF and ISFF projects.

Military Construction Authorization

Sec. . The military construction project at Augusta, Georgia, authorized in section 2401 Public Law 109-163, is hereby authorized in the amount of \$340,854,000. This project may be incrementally funded. Funds appropriated in Public Law 109-114 for this project shall be available to fund the first increment.

This provision increases the total authorized spending amount to complete construction of the National Security Agency's Regional Security Operation Center replacement facilities in Augusta, Georgia. Section 2401 of the National Defense Authorization Act for FY 2006 (P.L. 109-163) authorized \$61,466,000 for replacement facilities construction. In addition, the provision clarifies that the amount appropriated for construction of the facilities in P.L. 109-114, estimated at \$48,476,000 after rescission, is available to fund the first increment of the project.

Sec. . The military construction project at Kunia, Hawaii, previously authorized in section 2401 of Public Law 109-163, is hereby authorized in the amount of \$350,490,000. The project may be incrementally funded. Funds appropriated in Public Laws 108-7, 108-87, and 109-114 for this project shall be available to fund the first increment.

This provision increases the total authorized spending amount to complete construction of the National Security Agency's Kunia Regional Security Operations Center replacement facilities in Hawaii. Section 2401 of the National Defense Authorization Act for FY 2006 (P.L. 109-163) authorized \$305,000,000 in spending for the project. In addition, the provision clarifies that the amounts appropriated for construction of the facilities in Public Laws 108-7, 108-87, and 109-114, a total estimated at \$147,126,000 after rescissions, is available to fund the first increment of the project.

Authority to Provide Assistance to Sudan

Sec. . Funds made available in this Act for foreign assistance may be provided for Sudan, notwithstanding any other provision of law.

This authority would permit assistance, particularly under the headings "Economic Support Fund" and "Peacekeeping Operations" under this Act, to be provided for Sudan without regard to the multiple, cross-cutting and often redundant restrictions on assistance to that country. Sudan is subject to numerous restrictions on foreign assistance. For example, the restrictions relate to Sudan's presence on the state-sponsored terrorism list, Section 508 of the annual Foreign Operations Appropriations Act with respect to military coups, and Sudan's arrears on its bilateral debt with the United States.

Iraq Relief and Reconstruction Fund

Sec. . Title II of Public Law 108-106, as amended by Public Law 108-309, is further amended under the heading "Iraq Relief and Reconstruction Fund" by—

- (A) (1) striking "\$5,090,000,000" and inserting "\$5,036,000,000" for security and law enforcement;
- (2) striking "\$1,960,000,000" and inserting "\$2,349,800,000" for justice, public safety infrastructure, and civil society;
- (3) striking "\$4,455,000,000" and inserting "\$4,220,000,000" for the electric sector;
- (4) striking "\$1,723,000,000" and inserting "\$1,735,600,000" for oil infrastructure;
- (5) striking "\$2,361,000,000" and inserting "\$2,131,100,000" for water resources and sanitation;
- (6) striking "\$500,000,000" and inserting "\$465,500,000" for transportation and telecommunications;
- (7) striking "\$370,000,000" and inserting "\$333,700,000" for roads, bridges, and construction;
- (8) striking "\$793,000,000" and inserting "\$739,000,000" for health care;
- (9) striking "\$845,000,000" and inserting "\$805,300,000" for private sector development; and
- (10) striking "\$342,000,000" and inserting "\$410,000,000" for education, refugees, human rights, and governance.

(B) inserting before the period the following: ": Provided further, That amounts provided under this heading shall remain available for an additional 4 years from the date on which the availability of such funds would otherwise have expired, if such funds are initially obligated before the expiration of the period of availability provided herein, except that after such initial

obligation any subsequent obligation may be made without regard to the sectoral limitations set forth under this heading, as amended".

This provision would adjust the current sectoral limitations under the heading "Iraq Relief and Reconstruction Fund" (IRRF) to correspond to the existing allocations and allow the Administration to provide assistance in accordance with anticipated needs. It would also authorize funds obligated during their initial period of availability to remain available for obligation for another 4 years during which subsequent period they could be deobligated and reobligated without regard to the sectoral limitations initially applicable to them.

Sec. . To the extent not otherwise authorized, supervision and administrative costs of the Department of Defense associated with a construction project funded with the Iraq Relief and Reconstruction Fund may be obligated at the time a construction contract is awarded or, for pre-existing contracts, by September 30, 2006: Provided, That for the purposes of this section, supervision and administration costs include all in-house Government costs.

This section would overcome any concern that requirements and practice applicable to defense appropriations may somehow be deemed to apply to prevent the obligation of the entire costs associated with implementing a project, including administrative and supervision costs, at the time the projects costs are obligated before expiry of the period of availability; it has been limited to address Defense agency concerns so as to avoid any implication that such constraints apply generally to foreign assistance funds such as IRRF which are appropriated to carry out the purposes of the Foreign Assistance Act and to which such constraints do not apply either as a matter of law or practice.

Waiver of Authorization Requirements

Sec. . Funds appropriated or made available by transfer in this Act may be obligated and expended notwithstanding section 15 of the State Department Basic Authorities Act of 1956, section 10 of Public Law 91-672 (22 U.S.C. 2412), section 504(a)(1) of the National Security Act of 1947 (50 U.S.C. 414(a)(1)) and section 313 of the Foreign Relations Authorization Act, Fiscal Years 1994 and 1995 (Public Law 103-236).

The waiver of authorization requirements is included because there is no foreign relations authorization act for FY 2006. Section 504 of the National Security Act of 1947 requires that Congress specifically authorize agencies to spend funds appropriated for intelligence activities. This provision provides that authorization for the supplemental funds appropriated in this Act.

Emergency Designation

Sec. . The amounts made available in this Act are designated by the Congress as emergency requirements for the specific purposes provided herein.

LEGISLATIVE BRANCH
HOUSE OF REPRESENTATIVES

Salaries and Expenses

For an additional amount for "Salaries and Expenses," of the House of Representatives, \$36,200,000, to remain available until expended: Provided, That the amount provided under this heading is designated as an emergency requirement pursuant to section 402 of H. Con. Res. 95 (109th Congress), the concurrent resolution on the budget for fiscal year 2006.

This request would provide \$36.2 million to fund items necessary to ensure the continuing operations and security of the U.S. House of Representatives.

This proposal would increase FY 2006 outlays by \$18.1 million.

LEGISLATIVE BRANCH

ARCHITECT OF THE CAPITOL

General Administration

For an additional amount for "General Administration," \$5,000,000, to remain available until September 30, 2011: Provided, That the amount provided under this heading is designated as an emergency requirement pursuant to section 402 of H. Con. Res. 95 (109th Congress), the concurrent resolution on the budget for fiscal year 2006.

This request would provide \$5 million to purchase additional property of approximately 15 acres adjacent to the Alternate Computer Facility (ACF). The acquisition of additional land has been deemed by the Capitol Police Board as integral to the security of the ACF operations.

This proposal would increase FY 2006 outlays by \$4.5 million.
