

**NSA/CSS EVALUATED PRODUCTS LIST  
for  
HIGH SECURITY DISINTEGRATORS**

The Evaluated Products List (EPL) contains a listing of High Security Disintegrators that have been evaluated by the National Security Agency (NSA) or its designee and meet the performance requirements of NSA/CSS Specification 02-02, High Security Disintegrators. Inclusion of a product in the EPL is not an endorsement by NSA or the U.S. Government.

The EPL provides the device name, model number, rated capacity, distributor, manufacturer, sales/marketing contacts, configuration evaluated, and the materials (paper and/or paper/plastic punched tape material) that were evaluated for destruction for each individual unit. Models that have successfully passed evaluation for paper/plastic punched tape material will be listed as "PPKM" in the authorized material column of this document. Other compliant disintegrators identical to the models listed may be available under different brand names or through distributors or resellers. The EPL is organized by rated capacity and alphabetically by distributor name.

**The Destruction Evaluations and Guidance Branch of the NSA has determined that disintegrators currently listed on NSA/CSS 02-02 Evaluated Products List (EPL) provide adequate security for the destruction of optical media (CDs and DVDs) in accordance with NSA/CSS 04-02, Optical Media Destruction Devices. It is recommended that paper be mixed with the optical media during destruction. Please contact the manufacturer to determine if a specific product is mechanically suited for optical media destruction.**

The EPL shall be updated on a quarterly basis. Users are encouraged to contact the disintegrator manufacturers /distributors for assistance in selecting unit(s) best suited to their requirements, and to determine if additional disintegrator units have been added to the EPL in the interim.

The procedures for administration and distribution of the EPL are subject to change without notice. Inquiries from U.S. Government users should be forwarded through designated support channels to the NSA Information Assurance Directorate. All other inquiries should be directed to the NSA Public Affairs Office.
