October 2, 2002

ORGANIZATION: Westinghouse Electric Company

SUBJECT: SUMMARY OF MEETING HELD ON AUGUST 20, 2002, REGARDING

WESTINGHOUSE ELECTRIC COMPANY'S PRESENTATION AND DISCUSSION OF CONSTRUCTION SCHEDULING SOFTWARE

The Nuclear Regulatory Commission (NRC) met with Westinghouse Electric Company (Westinghouse) on August 20, 2002, at Westinghouse's offices in Monroeville, Pennsylvania to discuss Westinghouse's construction scheduling software. A list of attendees is provided in Enclosure 1. Westinghouse provided handouts during the meeting which included an agenda. These handouts can be accessed through the Agencywide Documents Access and Management System (ADAMS). This system provides text and image files of NRC's public documents. The handouts mentioned above may be accessed through the ADAMS system under Accession No. ML022550331. If you do not have access to ADAMS or if there are problems in accessing the handouts located in ADAMS, contact the NRC Public Document Room (PDR) Reference staff at 1-800-397-4209, 301-415-4737, or by e-mail to pdr@nrc.gov.

The purpose of the meeting was to discuss Westinghouse's construction scheduling software. Westinghouse discussed the program that they use for their construction scheduling for the AP1000. They also presented the program that they use to give a virtual tour of the plant as well as a four-dimensional presentation of the construction. The Office of Nuclear Reactor Regulation (NRR) is in the process of updating its construction inspection procedures. Part of this effort entails development of a construction inspection program information management system (CIPIMS). NRR is meeting with various applicants to discuss their construction scheduling software in order to determine how best to develop NRR software. Background regarding the CIPIMS can be found in Attachment 4 of the "Draft Report on the Revised Construction Inspection Program," October 1996 (ADAMS Accession Number ML011690096).
