Comment Text :

-->I'm an Engineer from UC Berkeley! I wish Yucca Mt questions could only be answered by engineers or folks that demonstrate some knowledge of our energy needs and possible solutions. That requirement would exclude Sen Reid and most politicians! France gets 70% of their power from nuclear and they reprocess the fuel rods. Since we're not "smart" enough to reprocess, we need to safely bury the nuclear waste - Yucca Mt is a good spot - I've toured it and was impressed with the science and geology. If Nevada were smart, we would PROFIT from the disposal site, rather than blindly fight it.
