EIS Document Manager
Regulatory Authority Office
Office of Civilian radioactive Waste Management
U.S. Department of Energy
1551 Hillshire Dr.
M/S 010
Las Vegas, NV 89134

Dear Dr. Summerson,

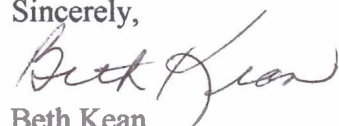

This letter is being written in regards to the project known as The Supplemental Yucca Mountain Project. This project should be discontinued immediately. We cannot safely transport nor safely deposit nuclear waste products. Unfortunately, we still have nuclear plants that continue to produce radioactive waste. Common sense says that we would have known how to safely store radioactive waste **BEFORE** we ever built these plants. We did not use common sense.

We still do not have an answer for radioactive waste, but if we would engage in common sense now, we could stop the bleeding. Shut down all nuclear plants in operation. Maximize security plans and store the waste at those sites. They are already contaminated sites for EVER- why make more? Do not build more nuclear plants.

This impact statement claims to be a document of the Department of Energy. **WAKE UP!** Energy for the future must assure us a future! Nuclear energy has never been, nor will it ever be, a safe, renewable source of energy. When will this department actually work on positive solutions to the world's energy needs vs. projects like this guaranteeing our destruction?

I urge you to bring common sense to the table and stop this nonsense before it is too late.

Sincerely,

Beth Kean

Berea, Ohio 44017

P.S. You have heard of NIMBY's? I am a NIMBY for as long as I have a radioactive-free back yard to come home to.
