-->I am totally against any kind of shipment(s) of nuclear waste to Yucca Mountain period.

As a Nevadan I have seen the D.O.E. make way too many serious mistakes and then cover them up, or try to cover them secretly without informing the public citizens of Nevada and the citizens of the U.S. what is going on !

This attempt to try and store High Level Nuclear Waste in Yucca Mountain was politically motivated by the Bush administration without any scientific research. There are over 200 scientists who publicly oppose storing nuclear waste at Yucca citing several documented flaws, even workers on the yucca site have come forward and admitted the seriousness of major mistakes and cover-ups at Yucca Mountain.

In stead of wasting billions of American tax dollars trying to bury Nuclear Waste at Yucca Mountain 90 miles away from Las Vegas Nevad a major metropolitan are of over 1.5 million people and growing, whoudn't it be more practical to look into ways to convert Nuclear Waste into resuable engery.
