Comment Text :

-->I am writing in hopes that my voice as a citizen will be heard and thoughtfully considered. I would like to express my great concern about the nuclear waste repository changes being considered for Yucca Mountain. This project is dangerous for Nevadans and other citizens along the route the waste will be transported through and the notion of moving such deadly material should be out of the question. I am concerned when I read daily about transportation accidents in America and our country simply cannot withstand the kind of devastation possible with long haul transportation of nuclear waste. Please join the fight to keep Yucca Mountain off of the list of possibilities for the federal government to store waste, in matters of such potential grave consequence we simply must err on the side of caution.

Thank you,

Carrie Reed
