Attn: Mr. M. Lee Bishop

Dear Sir:

I am so terribly opposed to any transportation of nuclear waste material. From all I have read, there is NO safe way to transport it – or to store it – at our current level of technology.

PLEASE! Leave it where it is until safe methods of deactivation are discovered. As a species inhabiting this earth, we cannot afford even one accident with this deadly material.

Emphasis and resources should be placed on NOT CREATING MORE nuclear waste, and then on determining how to neutralize what we have already accumulated.

DO NOT TRANSPORT NUCLEAR WASTE. ABANDON THE YUCCA MOUNTAIN REPOSITORY PLAN. IT IS NOT SAFE!!!
