Buddy, Can You Spare A Dime?

Why NYC Gets 9 Cents Per Person in Firefighter Homeland Aid, But the Entire State of Montana Gets \$9.07 Per Person.

An Analysis of the Distribution of FIRE Act Grants

BACKGROUND

The FIRE Act was signed into law by the President in December 2000 and was funded at \$100 million in FY2001 to provide fire departments with basic needs such as hiring and training personnel, prevention programs, equipment and facilities and public education. The program caps awards at \$750,000 for any fire department and requires a match of 10% for departments serving fewer than 50,000 people and a 30% match for department serving more than 50,000 people. These parameters were in place to ensure the program served smaller communities who had financial difficulty in supplying the basic firefighting needs to their communities.

MAJOR CHANGE AS A RESULT OF 9/11

In President Bush's first budget proposal for FY2002 he proposed eliminating the program arguing that it did not represent an appropriate responsibility of the federal government. This decision was reversed when Congress funded the program due to opposition from the fire fighter community. Then came the terrorist attacks of 9/11 and the program changed from a relatively small-scale program aimed at helping smaller communities fulfill their basic fire department needs into one of the primary homeland security programs and the designated program for fire departments to receive direct homeland security funding.

POST 9/11 FUNDING

Despite a post 9/11 significant funding increase that went from \$100 million for FY2001 to close to \$2 billion program for FY2002 through FY2004 and despite an inherent need for homeland security funds to be directed to where the most significant threat and largest vulnerabilities are, the formula was never changed. This means it capped assistance to high-threat and high-need areas at \$750,000. This formula prevents large cities such as New York, Los Angeles, Chicago Miami and Boston from receiving more than \$750,000 in FIRE Act funding, the same eligibility of a small town. It also prevents these large fire departments from purchasing the needed equipment to supply their firefighters with the equipment necessary to respond to future attacks. While small fire departments should be able to afford to purchase such as radios, hazardous material equipments and other apparatus to protect themselves, the program's cap will prevent large fire departments from purchasing the needed equipment for their homeland security needs.

THE PRESIDENT'S BUDGET PROPOSAL

This year, President Bush has proposed in his FY2005 budget to cut funding to the FIRE Act grant program by 33% (from \$750 to \$500 million) and, according to the Congressional Research Service, has proposed cutting first responder funding by \$2.3 billion for FY2005. The President proposes raising the cap from \$750,000 to \$2 million but also proposes prohibiting any funds from being used for fire code enforcement, wellness/fitness, fire station modification, fire prevention, and public education. While this is a recognition that the formula needs to change, by cutting overall funding, prohibiting the use of funds for important programs and still restricting funding with an arbitrary small cap that does not allow the Department of Homeland Security to distribute funding based on need and threat level to large cities.

ANALYSIS OF FUNDING LEVELS

Attached is an analysis of FIRE Act funding for FY2001 and FY2003. These years were chosen because FY2001 was the first year of the program and FY2003 is the most recent year that data is available. The FY2003 statewide data is as of February 20, 2004 and accounts for \$680 million in funding for FY2003. According to the Department of Homeland Security's website this is the total amount that they have distributed to date despite being almost 5 months into FY2004. According to their website, no grants have yet to be awarded for FY2004. The information provided for Congressional Districts for FY2003 only represents the first \$512 million of grants distributed (of the \$745 million appropriated). This was the latest information that has been made available to Congress broken down by Congressional District. What the data seems to show is a disturbing trend of funding not going to where the threat is, rather a haphazard distribution throughout the country and a distribution that seemingly benefits fire departments in Congressional Districts held by Republican Members.

The analysis of the funding found the following:

- Funding through this program appears haphazard with wide variations among areas receiving funds.
- Montana is the state that receives the most funding per person in this program at \$9.07 and Hawaii receives the least at \$0.78.
- After the attacks of 9/11 the purpose of the program changed dramatically and caused a rapid expansion of funding levels (\$100 million in FY2001 to close to \$2 billion from FY2002 to FY2004). Despite being the center of the terrorist attacks, New York City only receives 9 cents per person.
- Pennsylvania receives more grant money than any other state at \$44,414,829 and saw their percentage of these grants more than double from 3.2% in FY2001 to 6.5% in FY2003.
- A state-by-state per capita analysis found wide variations in grant funding. The states with the highest per capita funding are Montana with \$9.07, Vermont with \$8.38, Alaska with \$8.36 and Maine with \$8.10. The states with the least per capita are Hawaii with \$0.78, California with \$0.88, Florida with \$0.98. New York State received \$1.79 per capita and New York City received \$0.09 per capita.
- If the entire \$750 million was entirely distributed based on population, the funds would be distributed at \$2.56 per person. If this formula was applied NYC would

receive \$20.5 million opposed to the \$750,000 cap now in place or the \$2 million cap proposed in the President's Budget.

- Calculating the data per Congressional District, it appears that 18% of Democratic Congressional Districts did not receive any FIRE Act Grants in FY2003 but 97% of Republican Districts received grants.
- Despite an almost 50/50 split in Congressional Districts, Republican Districts received 60% of all FIRE Act grants funding.
- The average grant total per Democratic District is approximately \$1 million and the average grant total per Republican District is \$1.36 million. The average Republican District receives about 27% more than the average Democratic District.
- Since the inception of the program approximately \$115 million of funding for FY2001 through FY2003 has yet to be distributed and all of the \$746 million in FY2004 has yet to be distributed. The application process for FY2004 is just underway.

Conclusions: What Congress Should Do

1. Congress should reject President Bush's proposed \$2.3 billion in first responder cuts, including the \$250 million proposed cut to the FIRE Act program.
2. Congress must fix the formula so it should be targeted towards areas and departments with the greatest needs. Standards must be established by the Department of Homeland Security and funding should be directly targeted to filling holes identified by these standards. This funding should not be distributed haphazardly and arbitrary caps that only hobble this program should be eliminated.
3. Not only should Congress reject the President's first responder cuts and fix the FIRE Act formula, Congress must at the same time ensure that the original intent of helping small communities provide basic needs for their fire departments is maintained. This program can only be successful as a homeland security initiative if the basic needs of individual fire departments are met as well as large cities.

Note:

- The following pages include supplemental material used for this report. The Congressional Research Service (CRS) document (in the appendix) was used in compiling this report. The FY2001 and FY2003 FIRE Act totals are calculations from materials provided by CRS. The FY2001 are complete totals. The FY2003 total only represents data available for the first \$512 million in fund distributed. The FY2001 and FY2003 statewide totals and per capita totals is current as of February 20, 2004 and are available at:

Assistance to Firefighters Program

Lennard G. Kruger
Specialist in Science and Technology
Resources, Science, and Industry Division

Summary

The Assistance to Firefighters Program,¹ also known as the FIRE Act grant program, was established by Title XVII of the FY2001 National Defense Authorization Act (P.L. 106-398). Currently administered by the Office for Domestic Preparedness (ODP) within the Department of Homeland Security (DHS), the program provides federal grants directly to local fire departments to help address a variety of equipment, training, and other firefighter-related needs. The FY2004 DHS Appropriations (P.L. 108-90) funds fire grants at \$746 million for FY2004, and provides fire grant funding as a separate appropriation within the Office for Domestic Preparedness. The Administration's budget proposal for FY2005 requests \$500 million for the fire grant program, and would shift program priorities toward terrorism preparedness. Meanwhile, the FY2004 National Defense Authorization (P.L. 108-136) contains a provision (the "SAFER Act") which establishes a federal grant program to provide funding to fire departments for hiring personnel. The SAFER Act is authorized but not funded in FY2004. The Administration has requested no funding for SAFER grants in FY2005. This report will be updated as events warrant.

Background

Firefighting activities are traditionally the responsibility of states and local communities. As such, funding for firefighters is provided mostly by state and local governments. During the 1990s, shortfalls in state and local budgets, coupled with increased responsibilities (i.e. counterterrorism) of local fire departments, led many in the fire community to call for additional financial support from the federal government. While federally funded training programs existed (and continue to exist) through USFA's National Fire Academy, and while federal money has been available to first responders for counterterrorism training and equipment through the Department of Justice,² there did

² For a list of federal programs providing assistance to state and local first responders, see CRS (continued...)

not exist a dedicated program, exclusively for firefighters, which provided federal money directly to local fire departments to help address a wide variety of equipment, training, and other firefighter-related needs.

Authorization: The FIRE Act

During the 106th Congress, many in the fire community asserted that local fire departments require and deserve greater support from the federal government. In response, H.R. 1168, the Firefighter Investment and Response Enhancement (FIRE) Act, was introduced on March 17, 1999 by Rep. Pascrell. The bill authorized the Director of the Federal Emergency Management Agency (FEMA) “to make grants to fire departments for the purpose of protecting the public and firefighting personnel against fire and fire-related hazards.” In the Senate, the FIRE Act was introduced by Senator Dodd (S. 1941) and Senator Campbell (S. 1899). Ultimately, FIRE Act language was agreed to in the Senate by unanimous consent as an amendment offered by Senator Dodd to the FY2001 National Defense Authorization Act (P.L. 106-398, signed into law on October 30, 2000).

Title XVII of P.L. 106-398 amends the Federal Fire Prevention and Control Act (P.L. 93-498)³ to establish a new office in FEMA to administer grants to fire departments and fire prevention organizations for a variety of purposes, including: hiring and training personnel, prevention programs, equipment and facilities, and public education. The law stipulates that at least 5% of the funds go to prevention programs, that recipients agree to contribute a 30% nonfederal match (10% for fire departments serving jurisdictions of 50,000 or less), that a grant recipient may not receive more than \$750,000 for any fiscal year, and that volunteer departments receive a proportion of the total grant funding that is not less than the proportion of the U.S. population that those departments protect. Meanwhile, FEMA was directed to conduct an 18-month study (in conjunction with the National Fire Protection Association) on the need for federal assistance to state and local communities to fund firefighting and emergency response activities. The study, entitled, *A Needs Assessment of the U.S. Fire Service*, was released in January 2003 and found that many fire departments — particularly volunteer companies in rural communities — report shortfalls in facilities, equipment, and training of personnel.⁴

For firefighter assistance, P.L. 106-398 authorized \$100 million for FY2001 and \$300 million for FY2002. However, in the wake of the September 11, 2001 terrorist attack on the World Trade Center and the Pentagon, the Senate amended the FY2002 Department of Defense Authorization Act (S. 1438) to include language providing increased authorization levels for the Assistance to Firefighters Program. An additional increase was inserted during the House-Senate conference on the defense authorization bill, authorizing the program at \$900 million per year through FY2004, and expanding the scope of the grants to include equipment and training to help firefighters respond to a

terrorist attack or an attack using weapons of mass destruction. The bill was signed into law (P.L. 107-107) on December 28, 2001.

Appropriations

From FY2001 through FY2003, the Assistance to Firefighters Program (as part of USFA/FEMA) received its primary appropriation through the VA-HUD-Independent Agencies Appropriation Act. In FY2004, the Assistance to Firefighters Program began to receive its annual appropriation through the House and Senate Appropriations Subcommittees on the Department of Homeland Security. Table 1 shows recent appropriated funding for the fire grant program.

Table 1. Appropriations for Assistance to Firefighters Program, FY2001 - FY2005

FY2001	FY2002	FY2003 (P.L. 108-7)	FY2004 (P.L. 108-90)	FY2005 (Administration request)
\$100 million	\$360 million	\$745 million	\$746 million	\$500 million

FY2001. On December 21, 2000, President Clinton signed into law the Consolidated Appropriations Act 2001 (H.R. 5666; P.L. 106-554). P.L. 106-554 provided \$100 million in FY2001 funding for the Assistance to Firefighters Program.

FY2002. In its preliminary FY2002 budget document, “Blueprint for a New Beginning,” the Bush Administration proposed abolishing the fire grant program, arguing that it did not represent an appropriate responsibility of the federal government. After intense opposition from the fire community, the Administration reversed its position and proposed \$100 million in FY2002 for the Assistance to Firefighters Program. The November 6, 2001 House-Senate conference agreement (H.Rept. 107-272) set the Assistance to Firefighters Program at \$150 million for FY2002. The FY2002 VA-HUD appropriations act was signed into law (P.L. 107-73) on November 26, 2001.

Supplemental FY2002 funding for the firefighter grant program was provided in the homeland security package contained in the FY2002 Defense Appropriations Act (P.L. 107-117, H.R. 3338), signed into law on January 10, 2002. P.L. 107-117 appropriated an additional \$210 million in FY2002 funding for the Assistance to Firefighters grant program. Thus, the total FY2002 appropriation for the fire grant program was \$360 million.

FY2003. The President’s FY2003 budget proposal sought to transfer \$150 million of funding for the Assistance to Firefighter Program into FEMA’s newly formed Office of National Preparedness, where the fire grant program would be incorporated into the President’s proposed \$3.5 billion First Responder grant program.⁵ The 107th Congress was not able to complete passage of the VA-HUD-Independent Agencies appropriation for FY2003. In the 108th Congress, the FY2003 Omnibus Appropriations (P.L. 108-

⁵ See: CRS Report RL31475, *First Responder Initiative: Policy Issues and Options*, by Ben Canada.

7;H.J.Res 2) was signed into law on February 20, 2003, and provides \$745 million to the Assistance to Firefighters Program. P.L. 108-7 established a separate appropriations account for the program — “Firefighter Assistance Grants.” According to the H.J.Res. 2 Conferees, this new appropriations account is being established “so that there will be no doubt as to the importance of this program, and to protect this program from being lost in the morass of the Department of Homeland Security.”

FY2004. The Administration’s FY2004 budget requested \$500 million for the Assistance to Firefighters Program. The budget proposal sought to fund the fire grant program as part of the \$3.5 billion Office for Domestic Preparedness, located within the Department of Homeland Security’s Directorate of Border and Transportation Security. The FY2004 Department of Homeland Security Appropriations Act P.L. 108-90) funded fire grants at \$746 million for FY2004, and provided fire grant funding as a separate appropriation within the Office for Domestic Preparedness. The Conference Report (H.Rept. 108-280) specified that DHS shall “continue current administrative practices in a manner identical to the current fiscal year, including a peer review process of applications, granting funds directly to local fire departments, and the inclusion of the United States Fire Administration during grant administration.”

FY2005. The Administration’s budget proposal requests \$500 million for fire grants in FY2005, a cut of one-third (33%) from the FY2004 level. The Administration proposes three major changes to the fire grant program. *First*, priority will be given to applications enhancing terrorism preparedness. Currently, the program primarily focuses on helping fire departments meet an array of basic firefighting needs. *Second*, grants would be capped at \$2 million for fire departments serving populations of 500,000 or more. Currently, by statute, an individual grant cannot exceed \$750,000. And *third*, grants would be available only for training, vehicles, firefighting equipment, and personal protective equipment. Currently, grants are available for a number of additional purposes, including: fire code enforcement, wellness/fitness, fire station modification, fire prevention, and public education.

Program Implementation

Through FY2003, the Assistance to Firefighters Program was administered by the U.S. Fire Administration (USFA). Beginning in FY2004, the program is administered by the Office for Domestic Preparedness. At present, the program does not award funding for major building construction or for hiring of personnel. Eligible applicants are limited to fire departments (defined as an agency or organization that has a formally recognized arrangement with a state, local, or tribal authority to provide fire suppression, fire prevention and rescue services to a population within a fixed geographical area). Additionally, national, state, local, or community fire prevention or safety organizations are eligible to receive fire prevention grants. For official program guidelines, frequently-asked-questions, the latest awards announcements, and other information, see the Assistance to Firefighters grant program web page at: [<http://www.usfa.fema.gov/fire-service/grants/afgp/grants.shtm>].

The FY2003 grant application period began on March 10, 2003, and ended on April 11, 2003. About 19,950 applications were received, requesting approximately \$2.5 billion in funding (including both the federal and nonfederal share). Approximately \$2 billion in federal funding was requested. The first awards were announced on June 12, 2003.

FEMA and the USFA expect to announce awards weekly, and will obligate over 8000 grants by September 2004 as part of the FY2003 round of awards.

For the FY2004 awards, the federal rule, program guidelines, and notice of funding availability is expected to be released sometime in February 2004, with the beginning of the application period tentatively scheduled for March 15, 2004. Funding will be available in three categories: fire operations and firefighter safety, fire prevention, and firefighting vehicles. Grants for preparedness for weapons of mass destruction (WMD) incidents has been specifically added in all three categories. ODP plans to direct grant money to “WMD Priority Communities” – primarily high-threat urban areas.⁶

On May 13, 2003, the USFA released the first independent evaluation of the Assistance to Firefighters Program. Conducted by the U.S. Department of Agriculture’s Leadership Development Academy Executive Potential Program, the survey study presented a number of recommendations and concluded overall that the program was “highly effective in improving the readiness and capabilities of firefighters across the nation.”⁷ Another evaluation of the fire grant program was released by the DHS Office of Inspector General in September 2003. The report concluded that the program “succeeded in achieving a balanced distribution of funding through a competitive grant process,”⁸ and made a number of specific recommendations for improving the program.

The Administration’s FY2005 budget proposal is accompanied by program evaluations called the Program Assessment Rating Tool (PART). PART gave the fire grant program a rating of “Results Not Demonstrated,” and found that “the program is unfocused and has not been able to demonstrate its impact on public safety, though the grant administration process is generally well-managed.” The PART recommendation is as follows: “In 2004, ODP will strengthen performance measures and place greater emphasis on the unique role of Federal funds, particularly for terrorism preparedness. In addition, \$250 million is shifted to grants for ‘high-threat’ urban areas.”⁹

Issues

The Assistance to Firefighters Program is currently providing an unprecedented level of direct federal financial assistance to local fire departments. As such, firefighters strongly support the continuation of the fire grants as a viable, discrete, and well-funded program. The Administration has proposed \$500 million for the program in FY2005, a cut of 33% from the FY2004 level. Firefighters are likely to argue that the need for fire grant funding remains high and that a cut is not warranted.

⁹ *Budget of the United States Government, FY2005*, p. 177.

A related issue is the focus of the fire grant program, now that it has been relocated to the Office of Domestic Preparedness. From its inception, the program had been administered by the USFA (part of the EPR Directorate), and focused on enhancing the basic needs of fire departments across the nation. In the FY2004 budget request, as part of its effort to consolidate terrorism preparedness grants under a single entity, the Administration proposed to relocate the fire grant program within the Office for Domestic Preparedness (ODP), whose mission is to provide state and local governments with assistance to improve their readiness for terrorism incidents. The FY2004 DHS Appropriations Act (P.L. 108-90) acceded to the Administration's request, and relocated the fire grants to ODP.¹⁰ The Conferees directed that DHS shall "continue current administrative practices in a manner identical to the current fiscal year, including a peer review process of applications, granting funds directly to local fire departments, and the inclusion of the United States Fire Administration during grant administration."

The Administration's FY2005 budget proposal seeks to shift the focus of the fire grant program to terrorism preparedness, and would dedicate a significant portion of funding for "high-threat" urban areas.¹¹ Firefighting groups have questioned this proposed shift in focus, arguing that the original purpose of the Fire Act (enhancing basic firefighting needs) should not be compromised or diluted. Also at issue is whether the program will continue to provide significant support for rural (in many cases, volunteer) fire departments not located near "high-threat" areas.

Another issue is the role of the federal government in assisting fire departments to hire personnel. Firefighters have argued that inadequate state and local budgets leave many fire departments critically understaffed, and that federal assistance is needed. On the other hand, the Administration has argued that funding the hiring of firefighters is not an appropriate federal role. In the first session of the 108th Congress, Congress enacted the Staffing for Adequate Fire and Emergency Response Firefighters (SAFER) Act as Section 1057 of the FY2004 National Defense Authorization Act (P.L. 108-136; signed into law November 24, 2003). The SAFER Act authorizes federal grants of over \$1 billion per year through 2010 directly to fire departments for the hiring of personnel. The SAFER Act gives the U.S. Fire Administrator authority to issue 4-year grants for new hires, with the condition that the recipient fire department must assume an increasing percentage of the cost in each year. The SAFER provision is an authorization; the program can not be implemented until Congress appropriates money specifically for that purpose. No money has been appropriated for SAFER grants in FY2004. The Administration has requested no funding for SAFER grants in FY2005.

¹⁰ On June 12, 2003, Senator Collins introduced S. 1245, the Homeland Security Grant Enhancement Act of 2003. Section 3 of S. 1245 would place the Assistance to Firefighters Program within the Office for State and Local Government Coordination (OSLGC), which is within the Office of the Secretary of DHS. Under this proposal, the fire grant program would be separate from the Office of Domestic Preparedness (which would also be placed within the OSLGC). S. 1245 also provides that the fire grant program's current administrative rules and regulations be retained. On September 5, 2003, S. 1245 was reported by the Senate Committee on Governmental Affairs and placed on the Senate Legislative Calendar.

¹¹ The Administration's Program Assessment Rating Tool (PART) states that suburban and urban areas received 29% of fire grant funding in 2002, with urban areas receiving 9%.

Assistance to Firefighters	ODP	[\$500]	\$750	\$500
Citizen Corps	ODP	\$181	\$40	\$50
Emergency Management Performance Grants	FEMA	—	\$180	\$170
Urban Search and Rescue	FEMA	—	\$60	\$60
Interoperable Communications	FEMA	—	—	—
First Responder Assistance Total		\$3,739	\$3,955	\$3,426
Local Law Enforcement Block Grant	OJP	—	\$225	—
Byrne Memorial Formula Grant	OJP	—	\$659	—
Community-Oriented Policing Service	OJP	\$164	\$756	\$97
Law Enforcement Assistance Total		\$164	\$1,640	\$97
Public Health and Bioterrorism Preparedness	CDC	\$940	\$940	\$829
Bioterrorism Hospital Preparedness	HRSA	\$518	\$518	\$476
Metropolitan Medical Response System	OEP	—	\$50	—
Bioterrorism Preparedness Total		\$1,458	\$1,508	\$1,305
Port Security Grants	TSA	—	\$125	\$125
Water Security Assistance	EPA	\$32	\$32	— ^B
Hazardous Material Assistance	RSPA	\$13	\$14	\$14
Critical Infrastructure Protection Total		\$35	\$171	\$139
Homeland Security Assistance Total		\$5,396	\$7,274	\$4,967

Source: CRS calculations based on U.S. Office of Management and Budget, *Fiscal Year 2004 Budget of the United States Government*, (Washington: GPO, 2003), P.L. 108-90, and U.S. Office of Management and Budget, *Fiscal Year 2005 Budget of the United States Government*, (Washington: GPO, 2004).

^A The Administration proposed a first responder block grant (First Responder Initiative) that would have combined ODP and FEMA grants into a single grant program.

^B At this time CRS has not determined the amount requested for water security assistance in FY2005.
