"Take the road less traveled and be your own leader."

Name: Lisa Dali

Title: Payload Scientist

What I do: I work with NASA and scientists to develop/manage biological experiments for spaceflight on the Space Shuttle and International Space Station. I help identify experiment requirements and spacecraft equipment that will enable the experiment to be conducted successfully on-orbit.

Education: M.A. in Cell and Molecular Biology
B.S. in Microbiology
(minor in Chemistry)

Experience: Two years as a graduate student, two years working as a scientist/biologist

Skills: a strong science background, teamwork, communication, public speaking skills.

Interests: teaching fitness classes, outdoor adventures, reading, shopping, yoga
