

Trading Cards

"There are 24 hours in each day. We cannot add or take away from it. So the hour you're in at this moment, is your greatest hour and your greatest moment."

Name: Kimberly Jenkins

Title: Computer Design Engineer

What I do: I work with the NASA Kennedy Space Center managers to start different programs and projects. To ensure their success, we must clearly spell out the requirements, processes and procedures.

Education: B.S. in Computer Science

Experience: thirteen years as a software engineer, payload integration engineer, electrical software systems lead and technical manager

Skills: communication skills, project management and integration skills, and strategic, visionary thinking skills

Interests: watching basketball, soccer and football events, writing and motivational speaking
