

Trading Cards

Name: Andrew Watson

Title: Senior Scientist for Vision Research

What I do: I design experiments, collect and analyze data, write papers, and communicate with other scientists to understand how the human visual system works. I use that data to make computer models that can "see" like humans do; they judge visual quality in the same way the human eye can.

Education: Ph.D. in psychology

Experience: 2 years as a researcher, 8 years as a research psychologist, 10 years as a senior scientist

Skills: speaking and writing skills, curiosity about how things work, observation skills

Interests: cooking, bicycling, rollerblading, kickboxing, digital photography

"The true logic of this world is the calculus of probabilities" -James Clark Maxwell
