Hello!!

Hope this New Year is better than the last one!

I sure hope someone there can help.

My son lives alone and is not well. He gets phone calls from telemarketers and it is very hard on him.

How can he put a stop to them? He had staph infection in the blood and nearly died twice. Now he is left with joints - muscles etc that have been riddled by the infection. He can't work and is in constant pain.

People worry about getting calls when they are eating - in the bath - visiting - etc. try it when you are in pain or old and can't get up and down to

gas and can't hear very well  
 and answer the phone - after  
 a struggle - only to get a  
 sales person little low a recording  
 I bet many phones have been  
 broken - thrown - shut off  
 because of telemarketers.  
 Should be against the law for  
 any of them to do it  
 my son's number is

mine is

Thank you  
 Lola Walters
