RE: Prerecorded Message EBR  
Telemarketing Project # R411001  
TO: FTC

I couldn't have said it better than the writer of this letter to the editor. Please, please close this proposed loophole.

### Stop invasion of privacy

How dare the FTC grant permission to invade our homes with "prerecorded message telemarketing" ("Reins may be loosened on junk callers," Nov. 27)!

How many people/corporations greased the palms of the FTC to get this passed? As an American citizen, I am bombarded with enough junk via my telephone, cell phone, mail service and computer. I'm enrolled in the Do Not Call Registry, and I won't appreciate this type of annoyance by this proposed loophole!

Big Brother federal government is going too far to accommodate the Voice Mail Broadcasting Corp.'s request and circumventing the intent and purpose of the Do Not Call Registry program.

I am tired, tired, tired of these privacy invasions going by the wayside of politics. It's past time that the little people's voices be heard loud and clear in Washington, D.C.
